TREATMENTS AVAILABLE with the Sciton BBL HERO™

BBL™ Corrective

Worried your freckles, age spots or rosacea make you look less radiant and older? With BBL™ they will be a thing of the past! The light energy delivered by BBL will stimulate cells to regenerate and typically with the first treatment you will start to see smoother, more even and vibrant skin. The photothermal energy will eliminate fine vessels that cause redness and reduce unwanted melanin that produces age and sunspots. Your skin will feel smoother, fine lines and pores will be less noticeable, and sunspots or uneven pigmentation will fade.

- Correct age spots and redness for smoother, healthier and vibrant skin
- Pigmented lesions such as dyschromia and ephelides
- Vascular Lesions such as rosacea, telangiectasia and cherry angiomas
- Deeper lesions on darker skin types
